

PRIORITY SERVICE MAINTENANCE PROGRAM

PREVENTIVE MAINTENANCE FOR N-SERIES & F-SERIES

OVERVIEW

- Isuzu offers PSMP with every new Isuzu truck purchase or lease*
- PSMP can be purchased at the time of delivery or within one year of the original in-service date if the vehicle has:
 - Diesel: under 35,000 miles
 - Gas: under 25,000 miles
- Prepay for optional services: additional brake replacements, replacement tires, and DPF
- PSMP can be financed through Isuzu Finance of America or Mitsubishi HC Capital America

BENEFITS

By paying an up front fixed amount for scheduled maintenance, you will have peace of mind knowing scheduled maintenance costs are covered.

- Helps your truck retain its value at trade-in or resale
- If leasing or financing through IFAI or MHC, PSMP can be included in your monthly payment
- At trade-in, you can be reimbursed for any eligible, future-unused services

OPTIONS

- Tire Option allows the purchase of up to three sets of tires
- Brake Option allows for purchase of up to three front and up to three rear brake jobs
- DPF Substitution Option provides a replacement DPF in lieu of a DPF cleaning (*N-Series only*)

The number of scheduled maintenance services provided under the Isuzu Priority Service Maintenance Program is fixed based on the mileage coverage that you select. Once all maintenance and optional services have been provided, you will not be eligible for additional maintenance services under the program. Program services must be performed by an authorized Isuzu dealer. This program does not cover services outside scheduled maintenance. See the Priority Service Maintenance Program Enrollment form and your authorized Isuzu dealer for program terms and conditions.

PRIORITY SERVICE MAINTENANCE PROGRAM

The Isuzu Priority Service Maintenance Program gives you the flexibility to select coverage based on expected mileage and use. PSMP also provides an opportunity to pre-purchase additional wear items at today's prices. Program services must be performed by an authorized Isuzu dealer. You may cancel at any time and all eligible, future-unused services and options are fully refundable. This program includes recommended maintenance services as outlined in your owner's manual for Normal Vehicle Use. Vehicles used under unusual operating conditions such as driving in dusty areas (sweeper, agricultural or off-road vehicles), extended idling (refrigeration vehicles), or frequent short trips, will require additional vehicle maintenance, not included with this plan.

OPTIONAL SERVICES

Brakes: Your dealer's trained sales consultant can evaluate your truck's expected usage and recommend brake replacements to coincide with your PSMP term. This brake option allows for up to three front and three rear brake replacements (or any combination of them) at today's prices.

Tires: By selecting the tire option, you lock in the price for new tires. You can choose up to eighteen tires to be used as you please. You may change one tire at a time or change a full set.

DPF: DPF Substitution Option provides a replacement DPF in lieu of a DPF cleaning (N-Series only).

GAS TRUCKS

Miles	Kilometers
60,000	96,000
75,000	120,000
90,000	144,000
105,000	168,000
120,000	192,000
150,000	240,000
202,500	324,000

Covered items at each maintenance interval closely align with the factory maintenance schedule. You can purchase PSMP for the mileage terms shown in the two corresponding tables.

DIESEL TRUCKS

Miles	Kilometers
60,000	96,000
70,000	112,000
80,000	128,000
90,000	144,000
100,000	160,000
110,000	176,000
120,000	192,000
150,000	240,000
200,000	320,000
