

## **INCLUDE PRIORITY SERVICE MAINTENANCE WITH YOUR FINANCING OR LEASING**

Isuzu Finance of America, Inc. (IFAI) can include the cost of the Isuzu Priority Service Maintenance Program in your finance or lease agreement. IFAI finance and lease agreements can be tailored to meet your specific needs with terms ranging from 36 to 72 months.

You can choose from several purchase and lease plans, including traditional finance programs, TRAC leases with a variety of termination values or a closed end lease. All of these are with fixed rates, with no Consumer Price Index (CPI) increases and no inflated Schedule "A" values with reduced depreciation levels. Vehicle graphics, tax, title and license can be included in order to preserve your operating capital.

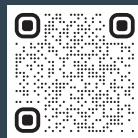

## **TAX BENEFITS**

Acquiring a new commercial truck with or without Priority Service Maintenance may allow your business to take advantage of valuable tax deductions such as special depreciation. Please check with your tax advisor or accountant for details.

The Isuzu Priority Service Maintenance Program gives you the flexibility to select both your program duration and the number of scheduled maintenance services you will receive. Program services must be performed by an authorized Isuzu dealer. You may cancel your program at any time during its term, and in the event of its cancellation all unused services are fully refundable. This program does not cover all recommended maintenance services, please see your owner's manual for further details. See the Priority Service Maintenance Program Enrollment Form for program terms and conditions.

The Isuzu Priority Service Maintenance Program (PSMP) is a comprehensive preventive maintenance schedule that allows you to prepay or finance your vehicle's maintenance costs. You can select terms starting at three years and up to five years (gas) or six years (diesel). This enables you to lock in and control your maintenance costs and focus on your core business.

PSMP provides you with services called for by the maintenance schedule for your Isuzu truck over the course of the month/mileage term that you select. Time/mileage (whichever comes first) options are available from 36 months/30,000 miles to 72 months/250,000 miles for N-Series diesel trucks and, from 36 months/30,000 miles to 60 months/202,500 miles for N-Series gas trucks.

Performing preventive maintenance will increase your vehicle's operating efficiency and help to maximize its fuel economy. At each service interval, your authorized Isuzu dealer will run a Vehicle Health Report showing your vehicle's fuel usage, idle time, driving history and much more. Your vehicle will be entered into Isuzu's Maintenance System, which will inform the Isuzu dealer and Isuzu's roadside assistance center that the vehicle is enrolled in the Isuzu Priority Service Maintenance Program and entitled to receive priority service.

## OPTIONAL SERVICES

**Brakes:** Your Isuzu dealer's trained Transportation Consultant can evaluate your operation and recommend an appropriate number of brake replacements to coincide with your PSMP term. This allows you to lock in future brake replacements.

**Tires:** By selecting the tire option, you are able to lock in the price for tire replacements. You choose the number and there is no restriction when these tires are replaced. You may need one for a damaged tire, or two or more for normal wear and tear.

**Substitute Vehicles:** This option provides you a yearly or total set number of substitute vehicles. You are not limited to using these as a replacement of your current vehicle; you can also use them at your discretion for peak periods or just as an extra vehicle.

**Additional Options:** Speak with your dealer's Transportation Consultant about other options to fit your needs.
